Softonic reviewSnapchat is an app that allows you to give and take brief flashes of daily updates in life. Since its inception in 2011, Snapchat has been one of the most popular social networking apps. With its instant yet temporary video and photo-sharing function, the app has garnered a lot of interest among netizens. It allows you to receive and send clips or photos called snaps instantly. People in your connections can view the snap for a few moments before it disappears. Instant social messaging with videos and filters!With frequent updates, Snapchat has changed a lot in recent years. At times, it can be hard to keep up with the changing interface and feature-set. However, the app makes sure people get more features to engage with content in an interactive manner. The parent company has always been aggressive with making changes to keep up with the evolving target audience. Available for Android and iOS, a Snapchat download makes social networking fast, fun, and interesting. The basics of using SnapchatBefore Facebook and Instagram added a story feature, Snapchat had started using videos to keep people interested in sharing about their daily lives. As of now, the idea has inspired several social networking tools and apps. The only drawback to using Snapchat is the lack of an analytics dashboard. The interface is simple and clean. As soon as you launch the app, it opens the device's camera and invites you to share a 'snap' with other users. Once you've taken a photo or clip, you can share it with friends or upload it as a story that can be viewed for a limited amount of time. Needless to say, the time boundation doesn't apply to the person posting the photo or clip. With its own Cloud storage, Snapchat for Android saves all your photos and clips in a secure environment. These can be viewed at anytime from anywhere. Have fun with customized bitmojisIn order to bring more people on-board, Snapchat has introduced a wide range of functions and features. It's kind of an upgrade that lets you do a lot more than simply sharing photos or clips. With a growing collection of 'face filters', the app has started allowing people to take clips of customized 'bitmojis'. If you're unfamiliar with the concept of a bitmoji, it's a 3D emoticon that can be customized to mimic your appearance. For instance, you can edit the hair style or color according to your current look. Additionally, you can change facial features, such as beauty marks and eye color, to match your appearance in real life. Bitmojis are available as part of a separate filter to make engaging snaps. These customized emoticons also mimic your movements, especially when you're talking to the camera. Simply put, sending a bitmoji is like sharing a cartoon version of yourself. Customized geofilters for each locationWhen you download latest Snapchat app, it provides you with creative options to share your whereabouts with other users. The app automatically generates geofilters, if your Android phone's GPS is open. The appearance of a geofilter depends on your exact location. Sometimes, the design of the geofilter reflects a nearby event. If you're attending a music festival or concert, expect the geofilter on the screen to match the place as well as the occasion. Snapmap lets you connect easilyAnother way to share your location is the Snapmap. It shares the exact location with a visual map. With the location of your friends depicted through bitmojis, you can easily pinpoint their whereabouts without much hassle. When you download Snapchat for Android, it allows you to look for friends in the neighborhood. Just pinch and slide your fingers outwards or inwards to zoom out and in. If you want to checkout a different neighborhood, just slide through your screen to scroll through the entire map. While Snapmap is an interesting way to find your friends' locations, it gives you an opportunity to keep a check on the community by watching stories. All you need to do is click a person's bitmoji icon to start watching. Not just a social but communications toolFrom a simple app to share photos and videos, Snapchat has gone a long way in allowing people to build intimate connections with friends. In recent years, the app has become a great tool for communication, giving tough competition to the likes of Hangouts, Skype, Messenger, and WhatsApp. Video calls on Snapchat aren't limited to one-on-one connections anymore. The app allows you to start a video chat with up to 16 people, ensuring a secure conferencing environment. During the video conference, you can use the AR lenses and face filters to make conversations engaging. Discover and exploreJust like Instagram, Snapchat app comes with a 'Discover' tab, which allows you to stay updated with trending topics and your friends' snaps. Home to a wide range of topics, the app displays a list according to your preferences. TV shows, News, and snaps from influencers are displayed in the 'Discover' tab. In here, you can conveniently find your friends' stories, which appear as icons at the top of your screen. Right below these icons, you can see stories and snaps of the topics that the app thinks you might be interested in. The fastest way to share real-life moments! Snapchat's latest version is a creative and fun way to share snaps with your friends and family. With quick updates, the company keeps evolving and growing. If you download Snapchat, you're always just a few clicks away from checking out your friends' lives and updates. AR lenses, face filters, bitmojis, and other effects add flavor to Snapchat's growing user base, and make the social experience more relaxing, engaging, and fun. Go ahead! Download Snapchat app and give it a try!
